

# FOUNDATION FILM

PLASTICKAR, JULY 2021

## FOUNDATION FILMS

Construction Foundation or **Concrete Pouring Films** are typically produced from recycled Polyethylene (PE), and are manufactured in black, gray or green color rolls with different sizes and thicknesses. For maximum resistance against ambient conditions, it is recommended to use top quality transparent foundation films which are manufactured from pure virgin material.

<b>Product Name</b>	Foundation Film
<b>Other Names</b>	Concrete pouring film, Construction film
<b>Application</b>	At the time of foundation construction; laid on the foundation soil as a thermal and moisture insulation, prior to the concrete pouring process.
<b>Features</b>	<ul style="list-style-type: none"> <li>▪ Affordable price</li> <li>▪ Proper and uniform coverage</li> <li>▪ Prevention of moisture penetration</li> <li>▪ Easy installation</li> <li>▪ No requirement for maintenance</li> </ul>
<b>Thickness</b>	Typically, 70 to 200 microns (based on the customer's request)
<b>Width</b>	Typically, 40 cm to 10 meters (based on the customer's request)
<b>Color</b>	Gray, Green, Black, Transparent (based on the customer's request)
<b>Packaging</b>	Rolls wrapped with PE film, inner core diameter is 76 mm, the core could be further supported by plastic lids on both ends of the roll.
